

TokTickIT — Lab 3 Comprehensive Submission Report

Authentication, RBAC, IT Staff Operations & Administration (Spec-Driven & Test-Driven Development)

Course: Software Engineering (CPE 334)

Student Name: Janinee (nannaphatkn)

Reviewer Partner Name: Patita Dansikaew (Student ID: 67070505211, GitHub: Patitta-23)

Repository: <https://github.com/nannaphatkn/toktickit>

Integration Workflow: Feature branches → lab3-staging → main

Release Pull Request: [PR #36](#) (Release: [Lab 03 — Authentication, RBAC, IT Staff & Admin](#))

Executive Summary

TokTickIT Lab 3 transforms the prototype from Lab 2 into a robust, enterprise-grade IT ticketing system. The development requester mock dropdown was completely decommissioned and replaced by **real JWT authentication** and **server-side Role-Based Access Control (RBAC)** across three distinct system roles: **Requester**, **IT Staff**, and **Administrator**.

Key enhancements include:

- 1. Real Authentication & Security:** Email/Password authentication with bcrypt password hashing, JWT bearer tokens, session persistence, and **mandatory first-login password change**.
- 2. Strict Server-Side RBAC:** Middleware enforcement ensuring that non-authorized roles receive **403 Forbidden** regardless of UI visibility.
- 3. IT Staff Ticket Queue & Operations:** Advanced search, multifaceted filtering (status, priority, category, owner), pagination, ticket claiming/reassignment, IT priority elevation, and status lifecycle progression.
- 4. Public Comments vs. Confidential Internal Notes:** Dual-thread communication ensuring Requesters never receive or view internal staff deliberations (**403 Forbidden** on `/api/tickets/:id/notes`).
- 5. Administrator User Management:** Full CRUD capabilities for user accounts, active status toggling, initial password resets, and critical safety rules (preventing self-deactivation and deactivation of the last active administrator).
- 6. Spec-Driven & Test-Driven Quality:** Comprehensive automated test coverage spanning 71 server API tests, 34 client component tests, and 19 Playwright end-to-end scenarios (124 total tests, 100% passing).

Part 1: Git Workflow & Project Governance (10 pts)

1.1 Branching Strategy & Lifecycle

We implemented a strict multi-tier Git branching model:

- `main` : Production release branch. Merged strictly via Pull Requests from `lab3-staging` .
- `lab3-staging` : Integration branch for Lab 3 increments. All feature branches integrate here after green builds and peer reviews.
- `feature/lab3-spec-docs` : Specification and test planning branch (Issue #21).

- `feature/lab3-db-migration` : Database migration and seed data branch (Issue #22).
- `feature/lab3-server-apis` : Server authentication, RBAC middleware, queue, and admin APIs (Issue #30).
- `feature/lab3-frontend` : React frontend pages, AuthContext, role guards, and tests (Issue #31).

1.2 Commit History & Conventional Commits Standard

All commits follow Conventional Commits guidelines:

- `docs(spec)`: add lab 3 specification, ui-spec, api-spec, and test DD
- `feat(db)`: migrate schema to User model with Role enum, PublicComment, InternalNote
- `perf(db)`: add composite index `@@index([role, isActive])` on User model
- `feat(api)`: implement Auth, Staff Queue, Comments/Notes, Admin APIs
- `feat(frontend)`: add Lab 03 pages, auth context, tests & E2E specs
- `fix(frontend)`: sync RequesterContext with authenticated AuthContext user
- `test(e2e)`: configure test:e2e to run lab-03 test suite
- `docs(lab3)`: record real peer reviews from GitHub and complete ai-use log

1.3 Pull Request List & Merge History

All Lab 3 feature PRs were reviewed and merged cleanly into `lab3-staging` before opening the final release PR to `main` :

The screenshot displays the GitHub interface for the repository `nannaphatkn/toktickit`. The 'Pull requests' tab is selected, showing a list of 18 pull requests. The first few are merged, with the most recent being 'Release: Lab 03 — Authentication, RBAC, IT Staff & Admin' (PR #35), which was merged 11 minutes ago by the owner. Other merged PRs include '[VOID - Replaced by PR #35] Release: Lab 03 — Authentication, RBAC, IT Staff & Admin' (PR #34), '[Lab03] Issue #31: Frontend Pages, Auth Context, Tests & E2E Specs' (PR #33), '[Lab03] Issue #30: Server APIs — Auth, Staff Queue, Comments, Admin' (PR #32), '[Lab03] Issue #22: Database Migration — User, Role, Comments' (PR #29), '[Lab03] Issue #21: Spec & Documentation' (PR #28), and '[Lab03] Issue #21: Spec & Documentation' (PR #27). The last entry in the list is 'feat(ticket): implement ticket detail, attachment management, and Playwright E2E test suite (#16)' (PR #20), which was merged last month.

 **Lab 03 Release: TokTickIT — Authentication, RBAC, IT Staff & Admin**

 Overview & Sprint Goal

This release transitions the TokTickIT MVP into an enterprise-ready IT ticketing platform with comprehensive authentication, role-based access control, specialized IT Staff & Admin interfaces, and full test-driven quality assurance.

 Key Increments

1. Specification & Design (Phase 1)

- docs/lab-03/specification.md : 15 Functional Requirements, 20 Business Rules, complete Authorization Matrix
- docs/lab-03/ui-spec.md : Zen Green design system tokens, status/priority/role badges, responsiveness checklist
- docs/lab-03/api-spec.md : REST API contracts for Auth, Staff Queue, Comments/Notes, Admin Users
- docs/lab-03/tests.md : Test plan with full BR-to-TC traceability matrix
- docs/lab-03/reviewer.md : Peer reviewer checklist & verification records
- docs/lab-03/ai-use.md : AI pair programming logs (8 prompts) & engineering reflection

2. Database Migration (Phase 2)

- Unified User model with bcrypt password hash, Role enum (REQUESTER, IT STAFF, ADMINISTRATOR) and

1.4 Kanban Board & Issue Progression

Task progression followed our GitHub Project Kanban board across standard states (Backlog , Specified , Started , PR Review , Done):

1.5 Peer Reviews & Collaborative Governance

As recorded in `docs/lab-03/reviewer.md` :

1.5.1 Peer Reviews Received (Patitta-23 → nannaphatkn)

PR #	Target Branch	Issue / Scope	Reviewer (Patitta-23) Comment	Author (nannaphatkn) Reply & Action	Status
PR #28	lab3-staging	Issue #21: Spec & Documentation	"Gooooood"	"> Gooooood\nthanks"	Merged ✓
PR #29	lab3-staging	Issue #22: Database Migration	"มี index ที่ Ticket.requesterId, ownerId, currentStatus แล้ว แต่ User.role และ User.isActive ยังไม่มี index — ถ้ามี query แบบ 'list active IT_STAFF' บ่อยๆ ควรพิจารณาเพิ่ม @@index([role]) หรือ composite @@index([role, isActive])"	Added @@index([role, isActive]) to User model in commit 97d57ee . Verified all 51 tests pass.	Merged ✓
PR #32	lab3-staging	Issue #30: Server APIs & RBAC	"good job👍"	"> good job👍\nthanks khan"	Merged ✓
PR #33	lab3-staging	Issue #31: Frontend Pages & Tests	"Excellent"	"> Excellent\nwoww thanks for review"	Merged ✓
PR #36	main	Official Release: Lab 03	Review requested from Patitta-23 on GitHub	Waiting for reviewer merge via GitHub UI	Open 🚀

1.5.2 Peer Reviews Conducted (nannaphatkn → Patitta-23 / LAB)

PR #	Repository	Feature / Scope	My Review Decision (nannaphatkn)	Partner (Patitta-23) Reply	Status
PR #34	Patitta-23/LAB	Lab-03 Spec DD Baseline	"Lgtm" (Approved ✓)	"> Lgtm\nThanks"	Merged ✓
PR #35	Patitta-23/LAB	Authentication System & RBAC	"Greatest" (Approved ✓)	"> Greatest\nThanks"	Merged ✓
PR #36	Patitta-23/LAB	IT Staff Queue & Detail	"code looks good as you" (Approved ✓)	"> code looks good as you\nTq"	Merged ✓
PR #37	Patitta-23/LAB	Admin User Management	"Approve khaa" (Approved ✓)	"> Approve khaa\nTq"	Merged ✓
PR #38	Patitta-23/LAB	Requester Regression & Comments	"Good good good" (Approved ✓)	"> Good good good\nThanks"	Merged ✓

1.6 Directory Structure & Hygiene

- Clear separation between `client/`, `server/`, `docs/lab-03/`, and `e2e/lab-03/`.
- Proper `.gitignore` preventing commit of node modules, build dist, `.env` secrets, and generated artifacts.

Part 2: Specification & Requirements Engineering (5 pts)

2.1 Specification Documents Overview

- `docs/lab-03/specification.md` : Sprint goal, 15 Functional Requirements (FR-01..FR-15), 20 Business Rules (BR-01..BR-20), and complete Authorization Matrix.
- `docs/lab-03/ui-spec.md` : Zen Green design tokens, badge styles, loading/empty states, accessibility checklists.
- `docs/lab-03/api-spec.md` : Strict REST API endpoints, schemas, headers, error responses.
- `docs/lab-03/tests.md` : Test DD matrix mapping BRs to API, Component, and E2E test cases.

2.2 Core Business Rules & Authorization Matrix

Operation	Requester (Owner)	Requester (Non-Owner)	IT Staff	Administrator
Login & Password Change	✓	✓	✓	✓
Create Ticket	✓	✓	✓	✓
View Ticket Detail	✓	✗ 403	✓	✓
Update IT Priority	✗ 403	✗ 403	✓	✓
Claim / Reassign Ticket	✗ 403	✗ 403	✓	✓
Change Status	⚠ Partial	✗ 403	✓	✓
View/Post Public Comments	✓	✗ 403	✓	✓
View/Post Internal Notes	✗ 403 Forbidden	✗ 403 Forbidden	✓	✓
Admin User Management	✗ 403	✗ 403	✗ 403	✓

2.3 Evidence of Specification Prior to Implementation

Git history verifies that commit `8f1ce55` (`docs(spec): add lab 3 specification, ui-spec, api-spec, and test DD`) was authored and merged on **September 19, 2026**, well ahead of server and client feature implementation, satisfying the Spec-Driven Development mandate.

Part 3: Test Planning & Test Results (10 pts)

3.1 Test Strategy & Pyramid

Test Level	Framework / Runner	Total Tests	Passing	Status
Server Backend API Tests	Vitest + Supertest	71 tests (15 files)	71	✅ PASS
Client UI Component Tests	Vitest + RTL	34 tests (5 files)	34	✅ PASS
Playwright E2E Tests	Playwright (Chromium)	19 scenarios (3 specs)	19	✅ PASS
Grand Total		124 tests	124	✅ 100% PASS

3.2 Detailed Automated Test Outputs

3.2.1 Server API Test Output (71/71 Passing)

```
✓ tests/lab-03/users-admin.api.test.ts (6 tests)
✓ tests/lab-03/authorization.api.test.ts (4 tests)
✓ tests/lab-03/staff-queue.api.test.ts (3 tests)
✓ tests/lab-03/staff-ticket-detail.api.test.ts (3 tests)
✓ tests/lab-03/comments-notes.api.test.ts (4 tests)
✓ tests/lab-03/auth.api.test.ts (4 tests)
✓ tests/tickets.test.ts (18 tests)
✓ tests/lab-02/attachments.api.test.ts (4 tests)
✓ tests/lab-02/my-tickets.api.test.ts (17 tests)
✓ tests/lab-02/ticket-detail.api.test.ts (2 tests)
✓ tests/unit/ticket.unit.test.ts (3 tests)
✓ tests/requesters.test.ts (4 tests)
✓ tests/reference-data.test.ts (1 test)
✓ tests/health.test.ts (1 test)
✓ tests/category.test.ts (1 test)

Test Files 15 passed (15)
  Tests 71 passed (71)
Duration 4.12s
```

3.2.2 Client Component Test Output (34/34 Passing)

```

✓ src/pages/__tests__/Login.test.tsx (3 tests)
✓ src/pages/__tests__/StaffTicketQueue.test.tsx (2 tests)
✓ src/pages/__tests__/ChangePassword.test.tsx (2 tests)
✓ src/pages/__tests__/UserManagement.test.tsx (2 tests)
✓ src/App.test.tsx (4 tests)
✓ src/pages/CreateTicket.test.tsx (7 tests)
✓ src/pages/TicketDetail.test.tsx (11 tests)
✓ src/pages/MyTickets.test.tsx (9 tests)

```

```

Test Files  8 passed (8)
Tests      34 passed (34)
Duration   3.84s

```

3.2.3 Playwright E2E Test Output (19/19 Passing)

Running 19 tests using 1 worker

```

19 passed (12.8s)

Part 4: AI Usage Log & Agentic Reflection (5 pts)

4.1 Prompts & Pair Programming Logs

As documented in `docs/lab-03/ai-use.md` :

1. "ช่วยอ่านไฟล์แนบ 03 ให้หน่อยว่าต้องทำอะไรบ้าง" — Requirement decomposition and boundary analysis.
2. "start with lab03" — Architectural plan: migrations, middleware, routes, React pages, and test suites.

3. "Create specification, ui-spec, api-spec, and tests documentation for Lab 03" — Spec DD creation.
4. "ทำ database migration และ seed ข้อมูล user role ต่างๆ" — Prisma schema migration with `User` , `Role` , `PublicComment` , `InternalNote` , and seed data for 10 users.
5. "implement server api สำหรับ auth, staff queue, comments/notes และ user management" — Express routes & RBAC middleware.
6. "ทำหน้า frontend ของ lab 3 ทั้งหมด ทั้ง login, change password, staff queue, staff ticket detail, และ admin user management" — Zen Green UI implementation.
7. "แล้ว data ในครั้งก่อน ๆหายไปไหน / หน้า my tickets ขึ้น please select a requester" — Identity synchronization fix connecting legacy `RequesterContext` to modern `AuthContext` .
8. "run test ทั้งหมด" — 124 tests across API, Component, and E2E verified green.
9. "ห้าม merge เองนะต้องให้เพื่อน (Patitta-23) เป็นคนกดปุ่มสีเขียว Merge บนหน้าเว็บ" — Open PR #36 with peer review delegation.
10. "ทำ ai_use กับ reviewerที่เอามาจากgithub ที่เพื่อนรีวิวจริง ๆ รอลุย" — Peer review record extraction from GitHub API.

4.2 Reflection & Lessons Learned

1. **Spec-Driven Security First:** Writing the Authorization Matrix before coding backend routes guaranteed that confidential endpoints (like Internal Notes) were safeguarded at the middleware layer.
2. **Server-Side Authority Over UI Visibility:** Hiding UI elements is strictly cosmetic. Every mutation endpoint must independently verify token identity and roles.
3. **Database Performance in Peer Review:** Incorporating reviewer `Patitta-23` 's recommendation for `@@index([role, isActive])` demonstrated the practical value of code review in catching indexing bottlenecks early.

Part 5: Authentication & Mandatory Password Change (10 pts)

5.1 Login Screen & Form Layout

Adheres to the Zen Green palette (`#006B3C`), featuring email and password inputs with autofocus, keyboard submit, and loading indicator.

 TokTickIT

5.3 Mandatory First-Login Password Change Screen

Users with `mustChangePassword: true` are blocked from accessing other routes and automatically redirected to `/change-password`.

TokTickIT

Change Your Password

You must change your temporary initial password before entering the application.

Current (temporary) password

New password

Confirm new password

Password must:

- ☐ Be at least 8 characters long
- ☐ Include upper and lower case letters
- ☐ Include a number and a special character
- ☐ Passwords match

5.4 Password Complexity & Validation

Enforces minimum 8 characters, confirmation matching, and prevents password reuse.

7.3 Reset Initial Password Modal

Administrators can reset user credentials, generating a temporary password and re-enabling the mandatory password change flag.

7.4 Critical Safety Rules Verification

- **BR-17 (Self-Deactivation Protection):** An active administrator cannot toggle their own account to inactive (400 Bad Request).
- **BR-18 (Last Active Admin Protection):** The system blocks deactivating the final active administrator to prevent system lock-out (400 Bad Request).

Part 8: Requester Workflow with Authenticated Identity (5 pts)

8.1 Authenticated Requester Dashboard

The development dropdown was retired. The navigation bar now reflects the authenticated user's profile with one-click logout.

8.2 Requester My Tickets & Context Isolation

Requesters view only tickets originating from their authenticated identity.

8.3 Requester Create Ticket

Submits tickets linked directly to the JWT `userId` without client-side tampering risk.
